

Location

Comizo Barbel & Predator Fishing Spain, our camps is located in the Mid / North of Spain, where we have found the best places for predator fishing,theres a variety of species we target Black-Bass, pike, Wels Catfish, Zander as well as the famous **Comizo Barbel** these will be our main species we go for. we put allot of effort into these trips makingg it very adventurous and and trip youll never forget, making this a perffect trip for our clients. you get to fish relax and enjoy the beautiful outdoors,

In the main region of Extremadura we find numerous reservoirs to fish for Comizo Barbel, a perfect location to catch these huge barbels, and at the same time we have the odd carp take the bait as they eat the same bait, thisis ideal for the anglers who love a variety of species.

Comizo Barbel Land

Our main target fish is Barbels, a unique fish in the Iberian Peninsula and in Europe, which can reach very large sizes of up to 21 kg, there is a few methods to catch them ,artificial lures, fly fishing and the main recommende way to catch them would be flour-based baits.

In addition to the Comizo barbel a area near our camp we will have the opportunity to catch other species such as Black-Bass and Pike.

Fishing Season

In Spain, unlike other countries, it is characterized by having short and mild winters compared to the rest of Europe, being able to fish comfortably all year round, the most productive seasons to fish Comizo Barbel would be Spring and Autumn.

Location

so we Have a few good spots but the main one would be taking our guests down the northern part of the peninsula to go down the river in search of black-bass, pike, barbel, Zander and the colossal Wels Catfish.

Fishing Season

Depending on the species and the techniques to be used to fish, the most recommended months would be spring and early autumn, with the coldest months being the best for catching Barbos Bocageis, so and questions or would like to join us and like to know more please dont be shy
